

Papers relating to unsaturated soils:

G. N. Pande, S. Pietruszczak & Min Wang

Incorporation of gradation curve in the description of mechanical behaviour of unsaturated soils, accepted for publication, International Journal of Geomechanics, ASCE Int. J. Geomech., 2020, 20(2): 04019159

Min Wang; G. N. Pande; L.W. Kong; and Y. T. Feng

Comparison of Pore-Size Distribution of Soils Obtained by Different Methods, International Journal of Geomechanics, ASCE, April, 2016, ISSN 1532-3641.

Pande G. N. and Pietruszczak, S

On unsaturated soil mechanics - personal views on current research, Studia Geotechnica et Mechanica, Vol. 37, No. 3, 2015, DOI: 10.1515/sgem-2015-0035

Shin, H.S., K.Y. Kim and Pande, G.N.

Porosity and pore-size distribution of geomaterials from X-ray CT scans. Multiphysical Testing of Soils and Shales, Springer Series in Geomechanics & Geoengineering (SSGG) on Advanced Multiphysical Testing of Soils and Shales (AMTSS), L. Laloui and A. Ferrari (Eds.), 2012, pp. 177-186. (ISBN 978-3-642-32491-8)

S. Pietruszczak and G. N. Pande

'Constitutive Relations for Partially Saturated Soils Containing Gas Inclusions, Journal of Geotechnical Engineering, Vol. 122, Issue 1 (January 1996)

Pietruszczak, S and Pande, G. N.

On mechanical response of partially saturated soils at low and high degrees of saturation, Numerical Models in Geomechanics, NUMOG V, Pande & Pietruszczak (eds), Balkema, Rotterdam, 1995, pp 33-39.

S. Pietruszczak and G. N. Pande

On the mechanics of partially saturated soils, Computers & Geotechnics, vol. 12, no. 1, 1991.
